V.A. 302 BROOKSIDE, LLC, APPLICANT

PUBLIC HEARING to consider **Certificate of Appropriateness No. 654** – A request to replace roofing material on window coverings and porches for the residential building located at 302 Brookside Avenue (APN: 0171-203-13-0000) in the Administrative Professional (A-P) zoning district. The proposal may qualify for exemption from environmental review in accordance with the Section 15301 (Existing Facilities) and Section 15331 (Historical Resource Restoration/Rehabilitation) of the California Environmental Quality Act (CEQA) Guidelines.

HISTORIC AND SCENIC PRESERVATION MEETING: September 14, 2022

Planner: Brian Foote, City Planner

PROCEDURE FOR PUBLIC HEARING

- 1. Chairperson declares the meeting open as a public hearing.
- 2. Chairperson calls upon staff for report.
- 3. Chairperson calls for questions/comments from members of the Commission.
- 4. Chairperson calls upon applicant, or its representative, for comments/testimony.
- 5. Chairperson calls for comments/questions/testimony from members of the public (3 minutes per speaker).
- 6. Chairperson calls upon the applicant, or representative, for rebuttal comments (5 minutes).
- 7. Chairperson closes the public hearing.
- 8. Commission considers the motion(s) and votes.

SYNOPSIS

1. Historic Designation: The subject property at 302 to 308 Brookside Avenue is

designated as Historic Resource (HR) No. 81, known as the

"William Batty Building."

2. Existing Land Use: The property has one existing multi-tenant commercial

structure with office uses

3. Historic and Scenic Preservation Commission submittal dates:

(A) Date Submitted: May 4, 2022

(B) Date Accepted as Complete: August 30, 2022

(C) Historic and Scenic Preservation

Commission Meeting: September 14, 2022

4. Attachments:

- F-1) Resolution No. 2022-16 (Approval)
- F-2) Resolution No. 2022-16 (Denial)

PROPOSAL

The applicant proposes to replace the tile roofing material on window coverings and porch coverings. The applicant's proposal is to use a metal seam roofing material painted a dark red color (to imitate the appearance of red tile).

BACKGROUND

Property History: The Sanborn maps from 1908, 1915, and 1925 show two detached structures (likely residential uses) at the exact same location and footprint of the present structure. The Sanborn maps from 1938 and 1959 show the same structures, but the portion between them has been infilled with additional structure (forming a single unified structure), at the exact same location and footprint as the present structure. See attached Historic Inventory Sheets (Attachment C) and available historic photos (Attachment D).

Application for Certificate of Appropriateness: The application was filed as a Minor Certificate of Appropriateness. Staff has declined to approve the use of the proposed metal seam roofing, and the applicant has declined to propose other alternative materials rather than metal roofing. The applicant has declined to use wood shingle roofing or Spanish-style tiles that would be more appropriate to the style of the building and preserve its historic appearance and integrity. The applicant's representative offered to use asphalt shingles, however, that also would not be an appropriate material for consistency with the historic building style. Staff has referred the application to the Commission for review, and applicant is requesting additional guidance and suggestions from the Commission regarding appropriate roof materials that may be used.

Exterior Condition: Additional information about the condition of the exterior is available via Google Streetview online. At some point between the 2012 image and 2016 image, the overhang above the second story center window clearly began to fail and went unrepaired; from 2017 through 2021, one or two tiles are clearly missing from the top row. Between 2021 and 2022, several tiles were either removed or fell, as they looked like they slowly slid down the overhang structure between 2016 and 2022. Also beginning in 2017, one or two tiles appear to be missing from the easterly porch covering (top row at upper left corner) and has not been repaired. If there is an existing safety hazard from

HISTORIC & SCENIC PRESERVATION COMMISSION CERTIFICATE OF APPROPRIATENESS NO. 654 SEPTEMBER 14, 2022 PAGE 3

tiles potentially falling to the ground, then it is likely due to lack of routine maintenance at the time any failures became evident.

ANALYSIS

The Secretary of Interior Standards provides the following definitions for *Preservation* and *Rehabilitation*. Preservation may be appropriate if distinctive materials, features, and spaces are essentially intact and convey the building's historical significance. If the building requires more extensive repair and replacement, or if alterations are necessary, then Rehabilitation is probably the most appropriate treatment.

Preservation is defined as the act or process of applying measures necessary to sustain the existing form, integrity, and materials of an historic property. Work, including preliminary measures to protect and stabilize the property, generally focuses upon the ongoing maintenance and repair of historic materials and features rather than extensive replacement and new construction.... However, new exterior additions are not within the scope of this treatment. The Standards for Preservation require retention of the greatest amount of historic fabric along with the building's historic form.

Rehabilitation is defined as the act or process of making possible a compatible use for a property through repair, alterations, and additions while preserving those portions or features which convey its historical, cultural, or architectural values. The Rehabilitation Standards acknowledge the need to alter or add to a historic building to meet continuing or new uses while retaining the building's historic character.

In Rehabilitation, historic building materials and character-defining features are protected and maintained as they are in the treatment for Preservation. However, greater latitude is given in the Secretary of Interior (SOI) *Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings* to replace extensively deteriorated, damaged, or missing features using either the same material or compatible substitute materials.

A) Design and Architecture

The proposal is to replace the roofing material over the two front porches as well as the window coverings. No other work or alterations are proposed to any other sides or elements of the building.

Staff declined to approve the use of the proposed flat metal seam roofing in Red Brick

color, as it was believed to be incompatible with the SOI Standards. See Attachment E for the proposed materials/colors sample board. Staff met with the applicant and roofing contractor on August 9, 2022, and the applicant proposed an alternative material (asphalt shingle) which staff also was unable to approve due to inconsistency with the SOI Standards. The applicant stated he would not consider using wood shingles due to fire safety and insurance concerns. Therefore, this application was referred to the Commission for review.

The Commission may have other suggestions for appropriate roofing material to replace the existing heavy concrete tiles (such as fire-resistant wood shingle, lightweight concrete tile, lightweight Spanish tile, or other acceptable roof materials that may be available).

B) Secretary of the Interior Standards and Guidelines

The applicable Secretary of the Interior Standards were utilized to review the project plans. The Standards and Guidelines state that the proposed work should generally retain and preserve historic roofing materials and features where possible. Replacement of deteriorated or missing components is appropriate, but not replacing an entire roof feature or using other materials that do not match the historic roof feature.

Table 1: Secretary of the Interior's Standards for roofs.

Recommended	Not Recommended
Identifying, retaining, and preserving roofs and their functional and decorative features that are important in defining the overall historic character of the building. The form of the roof (gable, hipped, gambrel, flat, or mansard) is significant, as are its decorative and functional features (such as cupolas, cresting, parapets, monitors, chimneys, weather vanes, dormers, ridge tiles, and snow guards), roofing material (such as slate, wood, clay tile, metal, roll	Altering the roof and roofing materials which are important in defining the overall historic character of the building so that, as a result, the character is diminished. Replacing historic roofing material instead of repairing or replacing only the deteriorated material. Changing the type or color of roofing
roofing, or asphalt shingles), and size, color, and patterning.	materials.
Evaluating the overall condition of the roof to determine whether more than protection and maintenance, such as repairs to roof features, will be necessary.	Failing to undertake adequate measures to ensure the protection of roof features.

Repairing a roof by ensuring that the existing
historic roof or compatible non-historic roof
covering is sound and waterproof.

Removing historic materials that could be repaired or using improper repair techniques.

Failing to reuse intact slate or tile when only the roofing substrate or fasteners need replacement.

The following work is highlighted to indicate that it represents the greatest degree of intervention generally recommended within the treatment **Preservation**, and should only be considered after protection, stabilization, and repair concerns have been addressed.

Replacing in kind extensively deteriorated or missing components of roof features when there are surviving prototypes, such as ridge tiles, roof cresting, or dormer trim, slates, or tiles, or when the replacement can be based on documentary or physical evidence. The new work should match the old in material, design, scale, color, and finish.

Replacing an entire roof feature, such as a chimney or dormer, when limited replacement of deteriorated or missing components is appropriate.

Using replacement material that does not match the historic roof feature.

Source: The Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring & Reconstructing Historic Buildings (2017), pages 44-45.

At the present time, the proposal does not appear to meet the recommended SOI Standards due to the proposed roof material's incompatibility with the historic building materials and historic style. The Commission may make recommendations for the property owner to achieve compatibility with the SOI Standards and the City's guidelines.

C) City of Redlands Historic and Scenic Preservation Design Manual

The proposal may not be consistent with the Principles for Rehabilitation that are contained in the City's Historic and Scenic Preservation Design Manual. The applicable principles are summarized below.

- 1. Do not try to make a structure look newer or older than it is.
- Retain as many original materials as a budget will allow.
- If mixing old and new design and/or materials, make sure that the character or design of the house is not ruined in the process. If possible, obtain advice from an architect with rehab experience.
- 4. Avoid imitation materials or design elements whenever possible.

D) Summary

At the present time, the proposal may not meet the SOI Standards or the City's historic guidelines due to the proposed roof material's incompatibility with the historic building materials and historic style. The Commission may make recommendations for the property owner to achieve compatibility with the guidelines.

The Commission may also approve Certificate of Appropriateness No. 654 if the property owner will agree to accept and implement the Commission's recommendations for a compatible roof material, style, and color (as conditions of approval). If so, then the project would then be consistent with the Redlands Municipal Code, the Secretary of the Interior's Standards, and the City's Historic and Scenic Preservation Manual.

ENVIRONMENTAL REVIEW

If the proposal is deemed to be not consistent with the applicable Secretary of Interior Standards and the City's Historic and Scenic Preservation Manual, then the proposal would likely not be able to use an exemption from environmental review. Significant changes to historic resources are considered to be a potentially significant impact on the environment (CEQA Guidelines Sections 15064.5(b)(1) and 15064.5(b)(2)).

If the proposal is deemed to be consistent with the applicable Secretary of Interior Standards and the City's Historic and Scenic Preservation Manual, then the changes are considered to be satisfactorily mitigated and are less than significant impacts (CEQA Guidelines Section 15064.5(b)(3)). In that case, CEQA Guidelines Section 15301 (Existing Facilities) and Section 15331 (Historical Resource Restoration/ Rehabilitation) may be utilized for the project.

STAFF RECOMMENDATION

Staff recommends that the Historic and Scenic Preservation Commission discuss alternative roofing materials to assist the applicant in achieving consistency with the applicable Secretary of Interior Standards and the City's Historic and Scenic Preservation Manual.

Should the applicant propose an acceptable roofing material, method of construction, and retain the historic character-defining elements of the structure, then the Commission may make findings to approve the application and approve COA No. 654 subject to the conditions of approval.

Alternatively, should the applicant decline to utilize a compatible roofing material or retain the historic character-defining elements of the structure, then the Commission may make findings to deny the application and deny COA No. 654.

HISTORIC & SCENIC PRESERVATION COMMISSION CERTIFICATE OF APPROPRIATENESS NO. 654 SEPTEMBER 14, 2022 PAGE 7

MOTION

If the Historic and Scenic Preservation Commission deems it appropriate, staff recommends the following motion:

Motion (for Continuance):

"I move that the Historic and Scenic Preservation Commission continue the public hearing for Certificate of Appropriateness No. 654 (to October 6, 2022, or date to be determined)."

Motion (for Approval):

"I move that the Historic and Scenic Preservation Commission adopt Resolution No. 2022-16 and approve Certificate of Appropriateness No. 654, subject to conditions of approval, and find that the project is exempt from environmental review in accordance with Sections 15301 and 15331 of the CEQA Guidelines."

Alternative Motion (for Denial):

"I move that the Historic and Scenic Preservation Commission adopt Resolution No. 2022-16 to deny Certificate of Appropriateness No. 654 and find that the project does not qualify for exemption from environmental review in accordance with the CEQA Guidelines."

302 to 308 Brookside Ave. History

Redlands water hook-up shows a Isaac Jones in 9/4/1900 with two dwellings on the property. Each was one story and contained six rooms. Address' were 104 and 106. Assessment records show ownership passing from Mrs. C.F. (Margaret) Anderson to Isaac Jones

in 1903. (For assessment values see following sheet.)

Lot 4 of Block D was purchased in 1915 by David and Emma A. Beeler, changing to Nicolas J. and Lillian Lindt in 1920. Lot 4 was subdivided in 1924. The west side remained with Lindts and the east side was in the name of Teeple. Ownership of all of lot 4 went to a William Batty in 1930 until 1939. 1936 assessment records show improvements on the property at \$510.00. In 1937 improvements jumped to \$4000.00 indicating major construction. It can be assumed that the present building was constructed at that time and the owner was William Batty. The architecture of the building does fit into this time period.

On July, 1944 the Redlands Daily Facts published William Batty's death as June 30, 1944. He was a native of Paris, Ontario Canada and was a resident of Redlands for 24 years. No family or profession was listed. Internment was at Hillside Cemetery.

Howard C. Tilton purchased the property of Mr. Batty in 1939. By 1942 or 43 assessment records show the property no longer subdivided. Frank M. and Edna Lemon bought the property in 1945. According to George W. Burchill, the present owner, he purchased the property from Mrs. Lemon in 1967.

Architectural Inventory of 302 to 308 Brookside Ave.

Two story Spanish Eclectic apartment building with a flat parapet roof. The building is basically a rectangle with symmetrical features. Siding is stucco. Foundation-red brick covered with cement. A common window is: vertically rectangular (VR), slightly inset, opens in, plain wood trim and lugsills. Wood framed screens cover most of the windows. The W,S, and E windows have tile covered shed roofs.

S side(front)-Center portion of building extends forward. Top story of extention contains one window. Below window is a cement porch covered with a medium gable red tile roof. This contains a pediment of stucco. Under pediment is a plain wood frieze. Forch cornices are boxed. Two large, square porch posts support the roof. Resting on top of posts are exposed support beams. Four cement steps, with metal hand rails, lead to two centered front doors. (all S facing, front doors are identical) The two doors are separated by a strip of stucco. Each slightly inset door has a large center glass pane divided vertically and horizontally. Door trim is plain. At the bottom of each door Door trim is plain. At the bottom of each door is a wooden threshold, 1 step up. In the SE and SW portions of the building are two identical porches similar to the center porch except the roof is shed like. Four cement steps lead to a single door. Above each porch, and on the second story are three windows. The center window is amaller. Above and near this window is a stucco chimney on the roof line. It is capped with metal in a pyramid-like shape. On the first floor, on either side of each porch, is one window.

W side-NW corner is an addition of clapboard, set back from main building. Roof line is similar to front. Windows on addition do not have shed coverings. Second story, on addition, has two sets of windows separated by a vertical upright bar. First floor contains a three sash window separated by upright bars. Centered on main building, on roof line, is a identical chimney to S side. Second story from N to S: 1 three sash window then two windows. Lower level same as top. Above the foundation and centered is

a wood trimed foundation vent with lugsills.

E side-Identical to W side. N side-Additions to NE and NW corners extend out from N side of building. Roof along N side projects with boards attached at roof ends. Roofs over additions have shed like appearance. NE corner, on second story are two large, square windows facing N. Another set faces W. Below windows, on first floor, are two doors. (doors N side are all identical) N facing door at top has one VR glass pane. Below are three horizontally rectangular H.R. wood panels. Threshold is like the front doors. Facing W is another door. S of door is one thin VR window then one window. Five wooden steps, with wooden handrails, lead to a wooden stoop. Middle on N side. Four HR attic vents are located under roof line. Second story from E to W: 1 window, 1 smaller window then two windows. First floor identical to top. NW corner similar to NE except doors face N. Four wooden steps, with wooden handrails, lead to the first door and wooden stoop. Three more steps lead to another stoop and door. The top of this door is boarded over.

RELATED FEATURES:

Along the street on S and E sides is cutstone curbing. NW on property is a large metal, five car garage with a varagated tin roof. In very poor condition.

"A field guide to American Houses"-Virginia and Lee McAlester. page 417.

Spanish Eclectic-1915-1940

Flat roof-About 10 percent of Spanish Eclectic houses have flat roofs with parapeted walls. These typically show combinations of one and two-story units. Narrow, tile covered shed roofs are typically added above entryways or projecting windows. This subtype, loosely based on flat-roofed Spanish prototypes, resembles the Pueblo. Revival house.

STREET NAME

CITY OF REDLANDS COMMUNITY DEVELOPMENT DEPARTMENT PLANNING DIVISION

CERTIFICATE OF APPROPRIATENESS

Certificate No. 168

Historic Resource No. 81

Project Address: 302 Brookside Avenue

Name of Applicant/Owner: Chambers Group

Address: 302 Brookside Avenue

City: Redlands

State: California

Zip: 92373

A seven (7) square foot sign was approved through a Certificate of Appropriateness on January 18, 2001. The Certificate of Appropriateness is subject to the following Conditions of Approval:

CONDITIONS OF APPROVAL

- 1. The issuance of any permits shall comply with all provisions of the <u>Redlands</u> <u>Municipal Code</u>.
- 2. Unless construction has commenced pursuant to a building permit, or a time extension is granted in accordance with Code, this application shall expire on eighteen (18) months from the approval date which is July 19, 2002.

Note: This project can be extended by staff per Section 2.62.200 K for a period not to exceed thirty-six (36) months.

3. No Certificate of Occupancy shall be granted until all conditions of approval have been satisfied.

- 4. This approval is for a seven (7) square foot sign at 302 Brookside Avenue.
- 5. All plans submitted to the City shall reflect all Historic and Scenic Preservation Commission approvals and any other changes required by the Commission and/or staff. This condition applies to site plans, landscape plans, elevations, grading, and all other illustrations, text, or plans submitted to the City in connection with the project.

Richard Malacoff, AICP

Associate Planner

Historic Preservation Officer

January 22, 2001

Steel Roofing & Siding Products

Southwest Panel Guide

The Southwest climate can be brutal on roofs as well as electric bills, with long periods of relentless sunshine interspersed with rainstorms and high winds. Now you can protect your home and reduce your energy expenses with Nu-Ray's solar reflective, sustainable metal roof systems.

Decades of testing our products in the harshest environments on earth, from the North Slope of Alaska to the moist salt air of coastal California, have proven no other finish systems to be as beautiful, durable and easy to maintain as our proprietary D2 Kynar 500[®] featuring environmentally-safe **ULTRA**-Cool[®] technology.

Nu-Ray offers five industry-leading roofing panel systems ideally suited for the Southwest's climate and architectural styles—along with a full line of standard and custom flashings for the perfect finishing touch. We also provide delivery direct to the job site, and on-site roll-forming of all five profiles shown below. We also stock flat sheet and coil metal, all with our durable, reflective **ULTRA**-Cool paint systems.

Nu-Ray Metals

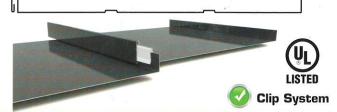

Steel Roofing & Siding Products

Architectural Panel Guide

Nu-Ray Metal Products has enhanced its product line with new roofing, siding, and soffit panels. Manufactured in Auburn, Washington, our lead times and service are unmatched. We also produce standard trims, custom trims, coil stock and flat sheet. Proudly partnered with PPG for the industry's best finishes.

NRM-1000

Traditional narrow rib design. 11/2" rib height

NRM-1750

Combines continuous snap-lock and floating clip design. 134" rib height

NRM-2000

Mechanical seamed panel ideal for low slope roofs. 11/2" rib height

NRM-4000

36" wide, screw through panel with smooth lines. 5/8" rib height

NRM-4500

36" wide screw through panel with added strength. 3/4" rib height

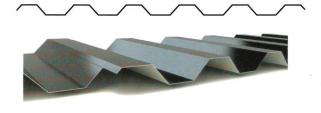

NRM-5000/6000

Classic snap-lock design in 12" and 16" widths.

NRM-7000

Industrial 7.2 rib panel. 11/2" rib height

NRM-8000

Flush wall and soffit panel available in 14 profiles. 13/4" rib height

NRM-9000

Ideal for walls, mansards and equipment screens. 7/8" panel depth

Nu-Ray Metals Steel Roofing & Siding Products

Product Descriptions

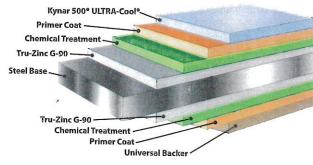

Kynar 500® ULTRA-Cool®

Kynar 500 ULTRA-Cool (PVDF) metal roofing coatings provide outstanding visual aesthetics, durability and long-term solar reflectivity for a wide range of architectural applications.

For more than 25 years.

Kvnar 500 has been the benchmark for demanding projects ranging from commercial and architectural buildings to residential and agricultural structures. Available in many contemporary colors, Nu-Ray's Kynar 500 ULTRA-Cool sets a new standard of excellence in architectural PVDF finishes.

Kynar 500 ULTRA-Cool coatings meet Cool Roof requirements of LEED, ENERGY STAR®, Title 24 and ASHRAE 90.1.

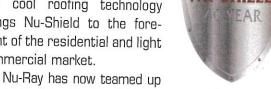

Nu-Shield® with Teflon® surface protector

Nu-Shield with Teflon® surface protector delivers true convenience without compromise. Nu-Shield features XT-40 Silicon Modified Polyester, incorporating the highest quality exterior grade ceramic

pigmentation, ensuring excellent long term color re-

tention against the damaging effects of UV light. Superior paint adhesion, anti-chalking and cool roofing technology brings Nu-Shield to the forefront of the residential and light commercial market.

with DuPont to offer Nu-Shield with Teflon® surface pro-

tector. This super-durable coil coating system brings unsurpassed performance against dirt, airborne oils, grime and other contaminants that cling to inferior coatings, keeping your investment looking new

and making it easier to clean for years to come.

Nu-Shield with Teflon® surface protector meets the Cool Roof requirements of LEED, ENERGY STAR®, Title 24 and ASHRAE 90.1.

TEFLON® is a registered Trademark of DuPont used under license by Nu-Ray Metal Products, Inc.

Nu-Ray SMP

Backed by our industry-leading 40 year warranty, Nu-Ray Metal's SMP (Silicone Modified Polyester) is a superb choice for many agricultural or light residential applications.

Available in Nu-Ray's Se-

ries 4000 Panel Profile. our custom Silicone Modified Polyester formula provides attractive, cost-effective protection for your building.

Bonded with stain-resistant resin, and offered in a large selection of colors, Nu-Ray SMP is a great choice when your budget is paramount.

RESOLUTION NO. 2022-16

A RESOLUTION OF THE HISTORIC AND SCENIC PRESERVATION COMMISSION OF THE CITY OF REDLANDS APPROVING CERTIFICATE OF APPROPRIATENESS NO. 654 FOR NEW ROOFING OVER PORCHES AND WINDOW COVERINGS ON AN EXISTING HISTORIC RESIDENTIAL BUILDING (HISTORIC RESOURCE NO. 81 – WILLIAM BATTY BUILDING) LOCATED AT 302 BROOKSIDE AVENUE.

WHEREAS, applicant 302 Brookside, LLC, has submitted an application for Certificate of Appropriateness No. 654 to replace existing tile roofing over porches and window coverings located at 302 Brookside Avenue (APN: 0171-203-13-0000) in the Administrative & Professional Office (A-P) zone in downtown Redlands; and,

WHEREAS, notice of this Historic and Scenic Preservation Commission public hearing for the Project was duly published in the Redlands Daily Facts by the Secretary to the Historic and Scenic Preservation Commission; and,

WHEREAS, on September 14, 2022, the Historic and Scenic Preservation Commission held a public hearing and considered the staff report, oral report, the testimony and the written evidence submitted by and on behalf of the applicant and by members of the public; and,

WHEREAS, the proposed project is exempt from environmental review in accordance with Section 15301 (Existing Facilities) and Section 15331 (Historical Resource Restoration/Rehabilitation) of the CEQA Guidelines, as there is no substantial evidence of any potentially significant impacts and the project qualifies for these exemptions.

NOW, THEREFORE, BE IT RESOLVED BY THE HISTORIC AND SCENIC PRESERVATION COMMISSION OF THE CITY OF REDLANDS AS FOLLOWS:

Section 1. The proposed project is exempt from environmental review in accordance with Section 15301 (Existing Facilities) and Section 15331 (Historical Resource Restoration/Rehabilitation) of the CEQA Guidelines, and there is no substantial evidence of any potentially significant environmental impacts to a historic resource.

- <u>Section 2.</u> The proposed scope of work for Certificate of Appropriateness No. 654 is consistent with the Secretary of Interior Standards and the city's local Historic Architectural Design Guidelines.
- <u>Section 3.</u> Certificate of Appropriateness No. 665 hereby approves the installation of new roofing over the porches and window coverings, subject to the conditions of approval contained in Exhibit A attached to this Resolution.

Section 4. This Resolution shall become effective upon adoption. If no appeal is filed within ten days (by September 26, 2022) in accordance with the Redlands Municipal Code, then a building permit for the work may be issued on September 27, 2022.

ADOPTED, SIGNED AND APPROVED this 14th day of September, 2022.

	Kurt Heidelberg, Chair, Historic and Scenic Preservation Commission
ATTEST:	
Linda McCasland, Secretary	_
Redlands, hereby certify that the foregoin	nic Preservation Commission Secretary of the City of g resolution was duly adopted by the Historic and Scenic eeting thereof held on the 14th day of September, 2022,
AYES: NOES: ABSENT: ABSTAINED:	
	Linda McCasland, Secretary, Historic and Scenic Preservation Commission

EXHIBIT A CONDITIONS OF APPROVAL CERTIFICATE OF APPROPRIATENESS NO. 654

- 1. This approval is for Certificate of Appropriateness No. 654 for installation of a new roofing (dark red color) over the existing porches and window coverings located at 302 Brookside Avenue (APN: 0171-203-13-0000), and in substantial conformance with the applicable Secretary of Interior Standards and the City's Historic Architectural Design Guidelines.
- 2. All plans submitted to the City as part of this Certificate of Appropriateness application shall reflect the project plans submitted on May 4, 2022, for this Certificate of Appropriateness and shall comply with all applicable provisions of the Redlands Municipal Code.
- 3. Unless construction has commenced pursuant to a building permit, or a time extension is granted in accordance with the Redlands Municipal Code, this permit/approval shall expire in eighteen (18) months from the approval date.
- 4. Prior to beginning any construction and/or demolition activities, a building permit(s) shall be obtained from the Building & Safety Division for the proposed scope of work (if required).
- 5. The applicant shall not make any modifications or changes during construction that are in conflict or contrary to the project's approved site design, or building elevations without first consulting the Development Services Director or designee.
- 6. The applicant for this permit, and its successors and assigns, shall defend, indemnify and hold harmless the City of Redlands, and its elected officials, officers, agents and employees, from and against any and all claims, actions, and proceedings to attack, set aside, void or annul the approval of this permit by the City, or brought against the City due to acts or omissions in any way connected to the applicant's project that is the subject of this permit. This indemnification shall include, but not be limited to, damages, fees, costs, liabilities, and expenses incurred in such actions or proceedings, including damages for the injury to property or persons, including death of a person, and any award of attorneys' fees. In the event any such action is commenced to attack, set aside, void or annul all, or any, provisions of this permit, or is commenced for any other reason against the City for acts or omissions relating to the applicant's project, within fourteen (14) City business days of the same, the applicant shall file with the City a performance bond or irrevocable letter of credit (together, the "Security") in a form and in an amount satisfactory to the City, to ensure applicant's performance of its defense and indemnity obligations under this condition. The failure of the applicant to provide the Security shall be deemed an express acknowledgement and agreement by the applicant that the City shall have the authority and right, without objection by the applicant, to revoke all entitlements granted for the project pursuant to this permit. The City shall have no liability to the applicant for the exercise of City's right to revoke this permit.

- 7. The applicant shall not make any modifications or changes during construction that are in conflict or contrary to the project's approved site design, or building elevations without first consulting with the Development Services Director or his designee.
- 8. Chemical or physical treatments, if appropriate, shall be undertaken using the gentlest means possible. Treatments that cause damage to any historic materials shall not be used.

Brian Foote, City Planner/Planning Manager Historic Preservation Officer

RESOLUTION NO. 2022-16

A RESOLUTION OF THE HISTORIC AND SCENIC PRESERVATION COMMISSION OF THE CITY OF REDLANDS DENYING CERTIFICATE OF APPROPRIATENESS NO. 654 FOR NEW ROOFING (METAL PANEL ROOF) OVER PORCHES AND WINDOW COVERINGS ON AN EXISTING HISTORIC RESIDENTIAL BUILDING (HISTORIC RESOURCE NO. 81 – WILLIAM BATTY BUILDING) LOCATED AT 302 BROOKSIDE AVENUE.

WHEREAS, applicant 302 Brookside, LLC, has submitted an application for Certificate of Appropriateness No. 654 to replace existing tile roofing over porches and window coverings with metal panels and metal seam roofing located at 302 Brookside Avenue (APN: 0171-203-13-0000) in the Administrative & Professional Office (A-P) zone in downtown Redlands; and,

WHEREAS, notice of this Historic and Scenic Preservation Commission public hearing for the Project was duly published in the Redlands Daily Facts by the Secretary to the Historic and Scenic Preservation Commission; and,

WHEREAS, on September 14, 2022, the Historic and Scenic Preservation Commission held a public hearing and considered the staff report, oral report, the testimony and the written evidence submitted by and on behalf of the applicant and by members of the public; and,

WHEREAS, the proposed project may significantly alter a historic resource and may cause potentially significant impacts to the environment or a historic resource, and therefore is not exempt from environmental review in accordance with the California Environmental Quality Act (CEQA) Guidelines.

NOW, THEREFORE, BE IT RESOLVED BY THE HISTORIC AND SCENIC PRESERVATION COMMISSION OF THE CITY OF REDLANDS AS FOLLOWS:

<u>Section 1.</u> The proposed project may significantly alter a historic resource and may cause potentially significant impacts to the environment or a historic resource as defined by CEQA Guidelines Sections 15064.5(a) and 15064.5(b), and therefore, is not exempt from environmental review in accordance with the CEQA Guidelines.

<u>Section 2.</u> The proposed scope of work for Certificate of Appropriateness No. 654 (replacing existing tile roofing with metal panel roofing with metal seams) is not consistent with the Secretary of Interior Standards or the city's local Historic Architectural Design Guidelines.

<u>Section 3.</u> Certificate of Appropriateness No. 654 is hereby denied and not approved.

Section 4. This Resolution shall become effective upon adoption. If no appeal is filed within ten days (by September 26, 2022) in accordance with the Redlands Municipal Code, then the decision shall become final on September 27, 2022.

ADOPTED, SIGNED AND APPROVED this 14th day of September, 2022.

	Kurt Heidelberg, Chair, Historic and Scenic Preservation Commission
